

# Foundation for Environment, Climate and Technology

## VACANCY: Epidemiological Scientist

A graduate (or Masters) with expertise in the field of Epidemiology, Biology or Zoology with research experience, who is genuinely interested in a career in research, is sought for a non-profit scientific, engineering, and socio-economic research organization. An aptitude for research, motivation to work independently, and willingness to learn new subjects is essential.

### The candidate must have:

- An understanding of the fields Epidemiology and/or the zoological sciences or in the fields underpinning them
- Keen interest in learning about environmental and climate impacts
- Record of research / publication
- Good skills in statistics, mathematics and willingness to improve not them.
- IT skills and demonstrated ability at self-learning
- English skills - especially in scientific writing
- Willingness to undertake field work in remote locations
- Able to work cooperatively in a multidisciplinary team to realize the overall goals
- Long-term goals for scientific, environmental and technological research
- Knowing other languages shall be added advantages.

To apply, send a full resume, cover letter and names of two referees who know your  
Past work by email to ([fectcv@gmail.com](mailto:fectcv@gmail.com) and [hr@tropicalclimate.org](mailto:hr@tropicalclimate.org) to receive immediate  
consideration. Applicants shall be received  
Until the post is filled.
