

FOUNDATION FOR ENVIRONMENT CLIMATE AND TECHNOLOGY

Physical Scientist

A person who is genuinely interested in a career in research in climate, environment, and Information and Communication Technology is sought for a non-profit scientific, engineering, and socio-economic research organization. The candidate should be a recently qualified graduate in physical sciences, engineering or information technology who is able to undertake climate and environmental diagnostics, modeling, and develop prediction. The researcher will carry out data analysis and modeling; oversees aspects of projects and undertake some field work.

The candidate must have:

- ✓ Strong mathematical, statistical and scientific programming skills
- ✓ An understanding of the laws of nature
- ✓ An aptitude for research, motivation to work independently, and willingness to learn new subjects
- ✓ Skills to write up results in reports / scientific papers / books in English
- ✓ The ability to work cooperatively in a multidisciplinary team environment to realize the overall project goals
- ✓ Long-term goals for scientific, environmental and technological research
- ✓ Research experience, and knowing other languages shall be added advantages.

Appointment is on contract basis and extendable. To apply, send a resume and names of two professional referees by email, by December 8, 2016. Review shall continue if position thereafter till position is filled.
