Under the PEER cycle 3 grant awarded to FECT, MNU and others, two automatic weather stations were made available to MNU and to LaMER for the Small Island Research Centre (SIRC) at Mathoda Island in the Huvadhoo Atoll. LaMER has installed these weather stations at Mathoda, Huvadhoo Atoll near the equator (0deg 12min 9.36sec N, 73deg 11min 5.08sec E) and observations are available from October 2016. The SIRC facility is currently engaged in addressing sustainability problems in small islands and is looking into ways to accommodate researchers both local and international research efforts while bolstering existing research efforts in the Maldives as well as building an international profile of research emanating from the Maldives.

This data is uploaded as the computers at SIRC is turned on and the data is accessible via a website and through twitter account.

**Main Partners:** Foundation for Environment, Climate, and Technology [FECT]; Maldives National University [MNU]; Maldives Meteorological Services [MMS]; NASA’s Goddard Space Flight Center [GSFC].

**Sponsors:** US National Academy of Sciences and USAID. The University of Auckland, New Zealand.

**About FECT**

The Foundation for Environment, Climate and Technology is a non-profit organization working to apply science for societal welfare and ecological sustainability in Sri Lanka Comoros and New York since 2003. FECT has been working in the Maldives since 2009 at the invitation of the Ministry of Environment. We have been partnering with government organizations, non profits and companies for a series of projects related to climate, water resources, disasters and infectious diseases. **About SIRC**

The Small Island Research Centre was established by Land and Marine Environmental Resource Group (LaMER) Pte Ltd in the Maldives. SIRC mainly focuses on the study of morphology, climate change and marine science. It has facilities to host researchers in Mathoda. SIRC helps facilitate research by overcoming obstacles such as obtaining government accessing clearances for scientists and providing accommodation, logistical and infrastructure support.
